// Motivation for automated driving functions

*Zero
emission*

Reduction of fuel consumption & CO₂ emission
Optimization of traffic flow

*Demographic
change*

Support unconfident drivers
Enhance mobility for elderly people

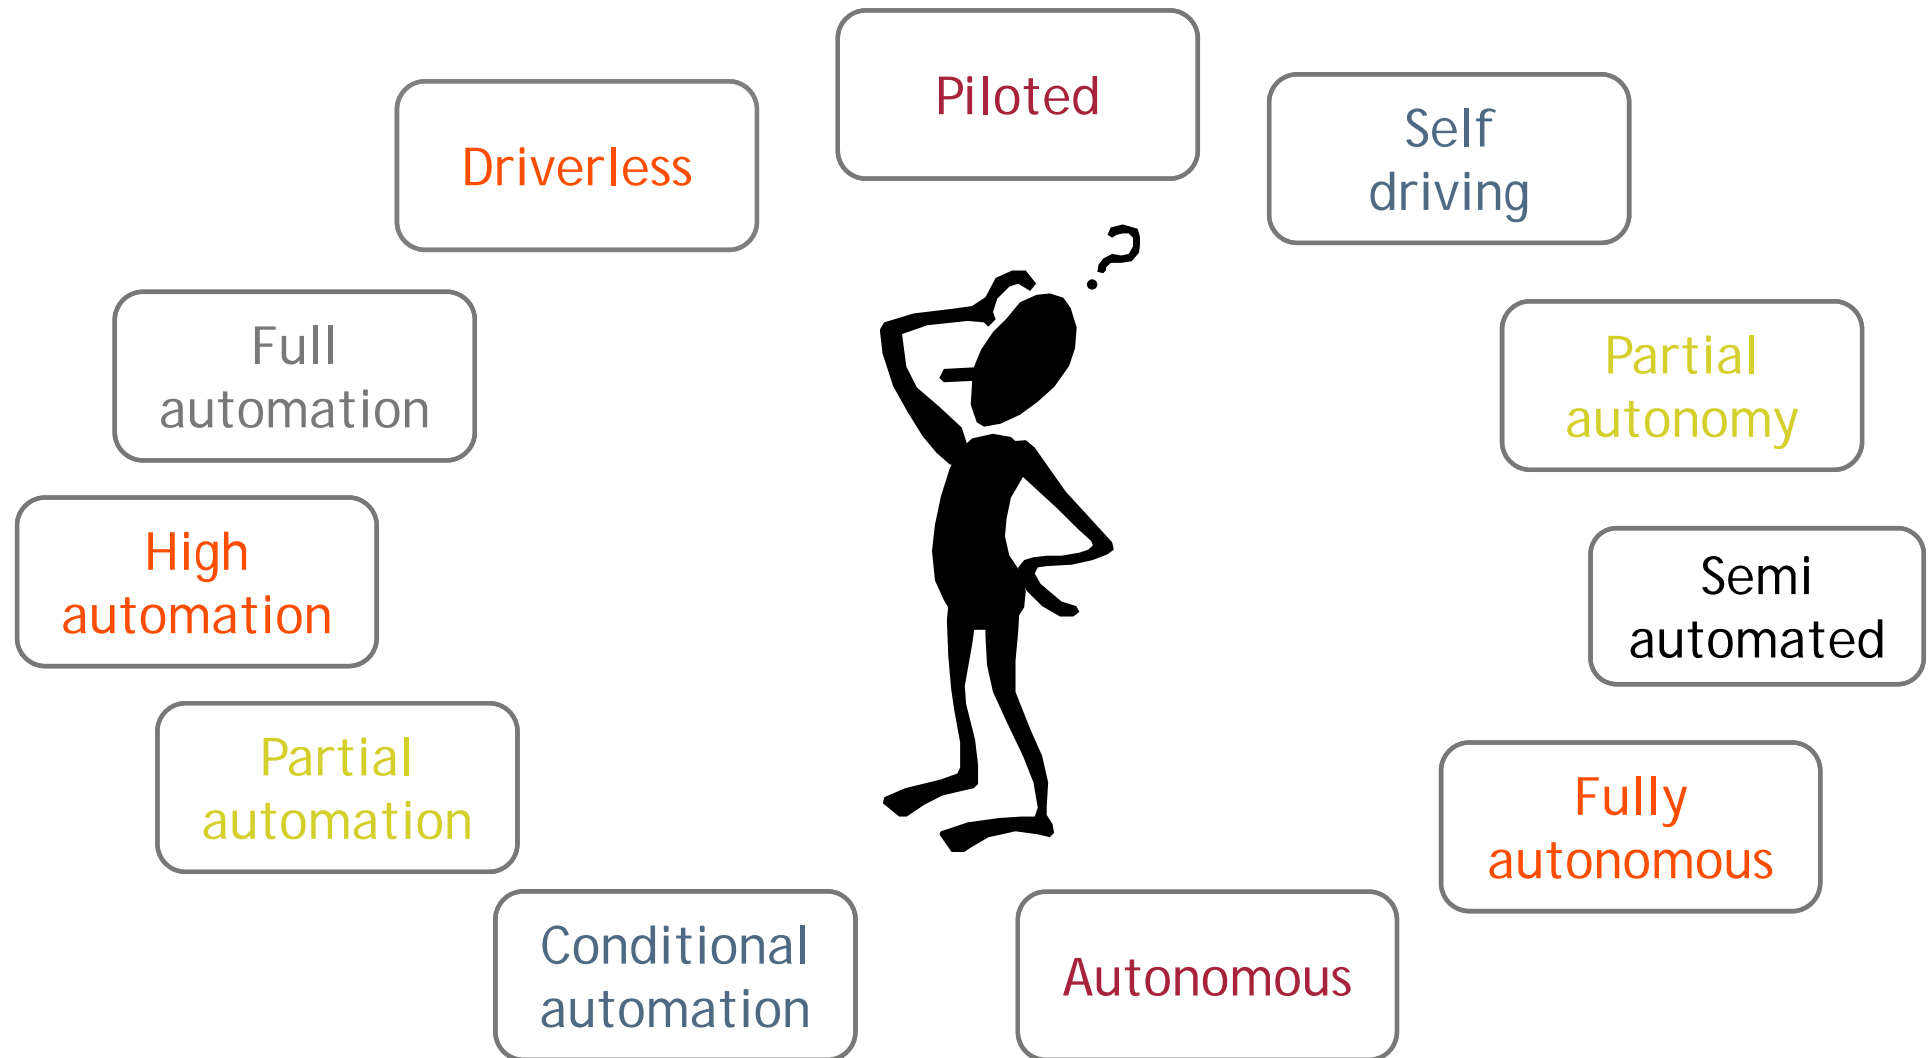

Vision zero

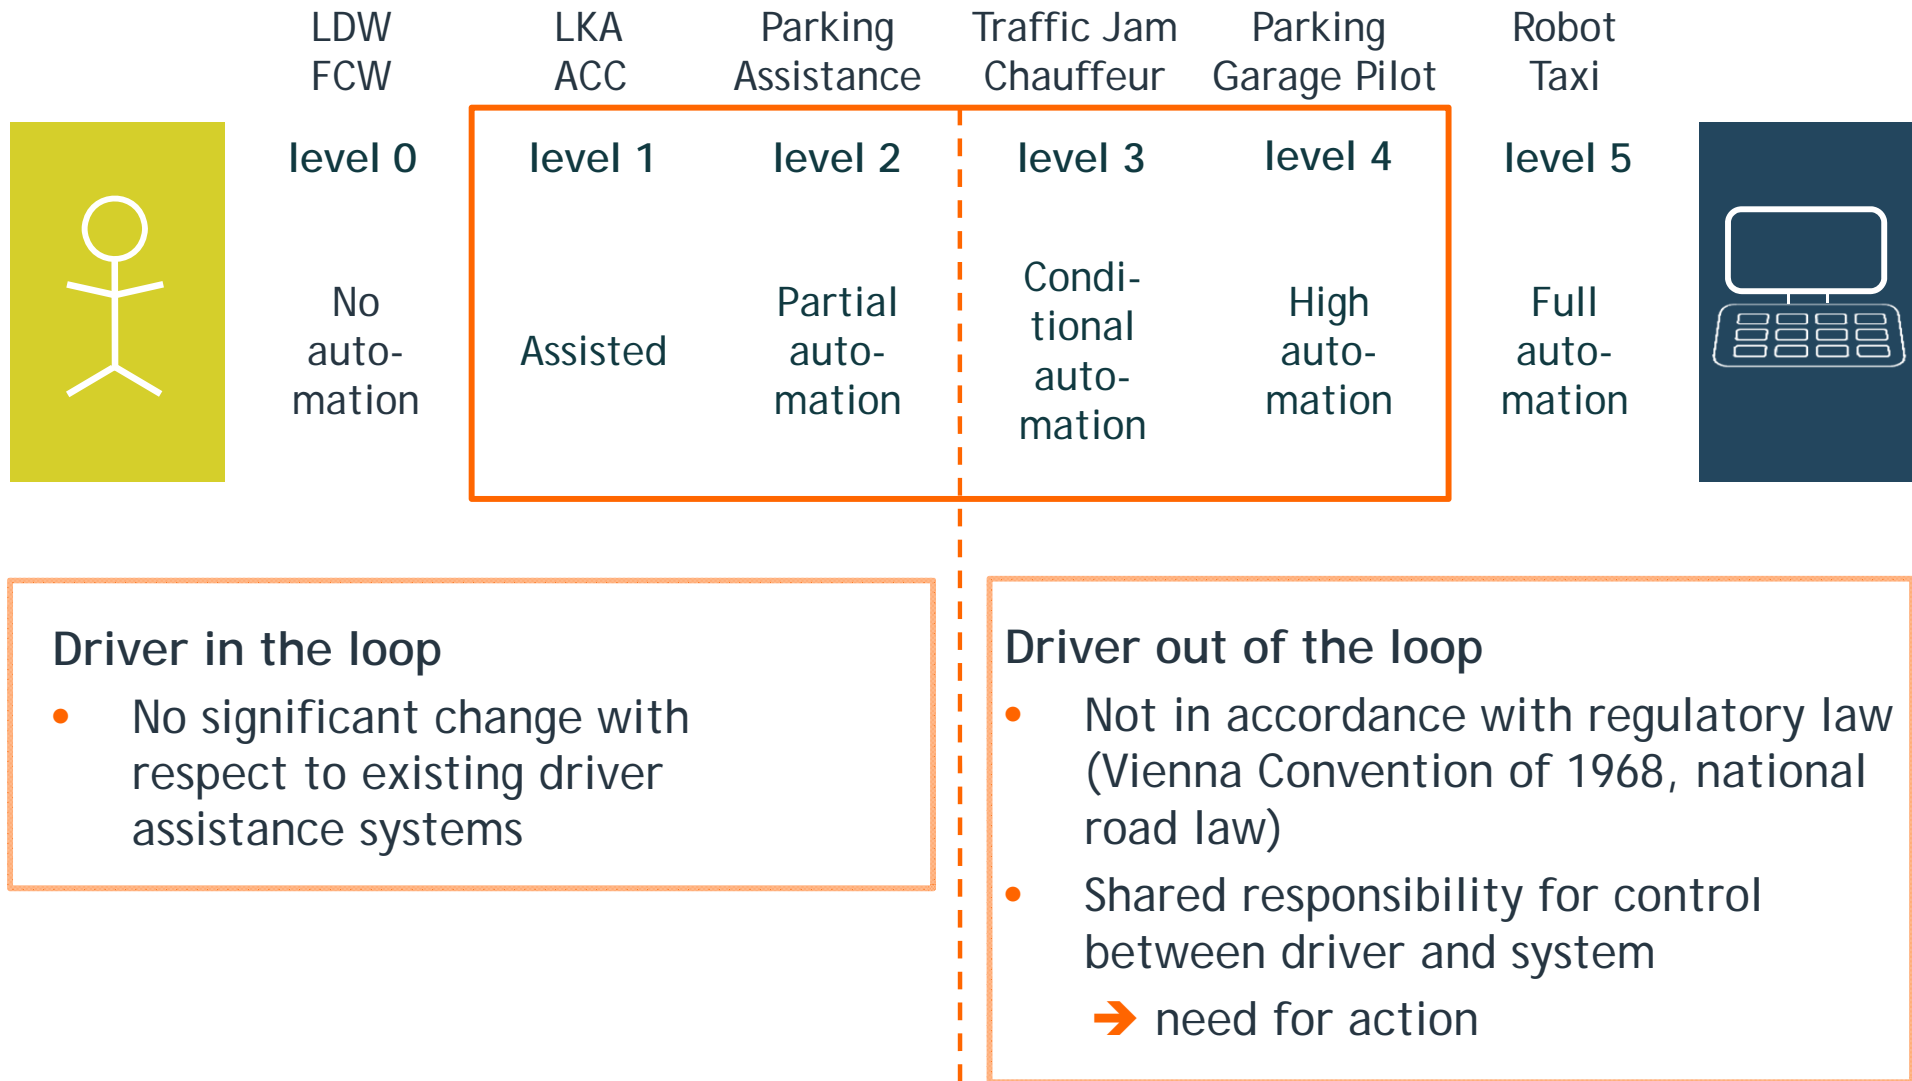

Potential for more driver support by avoiding
human driving errors

// Terms related to automated driving

// Levels of driving automation acc. to SAE and VDA

Source: SAE document J3016, "Taxonomy and Definitions for Terms Related to On-Road Automated Motor Vehicles", issued 2014-01-16, see also http://standards.sae.org/j3016_201401/

// Challenges and project objectives

Widespread application of automated driving to improve traffic safety, efficiency and comfort

// Automation Scenarios

< 30

< 70

< 130

// Introduction scenario

ACC: Adaptive Cruise Control
 LKA: Lane Keep Assist

LDW: Lane Departure Warning
 FCW: Forward Collision Warning

2	Partial automation		<div style="border: 2px solid orange; padding: 2px;">Parking assistant</div> Traffic jam assist.
1	Assisted	ACC LKA	City Cruise Constr. site ass.
0	No automation	LDW FCW	
		<i>ADAS today</i>	<i>ADAS tomorrow</i>

// Parking assistance // level 2

- Partial automated parking into and out of a parking space
- On public parking area or in private garage
- Via Smartphone or key parking process is started, vehicle accomplishes parking manoeuvre by itself
- Driver is located **outside** of the vehicle
- Driver has to **constantly monitor** the system, stops parking manoeuvre if required
- **Safety benefit** due to avoidance of parking damages and improved environment observation
- **Comfort benefit** because getting into and out of the car is simplified, especially for narrow parking spaces or garages

// Introduction scenario

3	Conditional automation			Traffic Jam Chauffeur
2	Partial automation		Parking ass. Traff. jam a.	
1	Assisted	ACC LKA	City Cruise Constr. ass.	
0	No automation	LDW FCW		
		<i>ADAS today</i>	<i>ADAS tomorrow</i>	<i>Automation Gen. 1</i>

// Traffic Jam Chauffeur // level 3

- Conditional automated driving in traffic jam up to 60 km/h
- On motorways and similar roads
- System can be activated, if **traffic jam scenario** exists: detection of slow driving vehicles in front
- Driver must deliberately activate the system, but does not have to monitor the system constantly
- Driver can at **all times** override or switch off the system
- Take over request if traffic jam scenario does not exist any longer
- **Safety benefit** via relief of the driver: no exhausting, manual driving during traffic jams
- **Comfort benefit** via relaxing and use of selected infotainment functionalities

// Introduction scenario

4	High				Parking garage pilot
3	Conditional automation			Traffic jam chauffeur	Highway chauffeur
2	Partial automation		Parking ass. Traff. jam a.		
1	Assisted	ACC LKA	City Cruise Constr. ass.		
0	No automation	LDW FCW			
		<i>ADAS today</i>	<i>ADAS tomorrow</i>	<i>Automation Gen. 1</i>	<i>Automation Gen. 2</i>

// Highway Chauffeur // level 3

- Conditional automated driving up to 130 km/h on motorways or similar roads
- From entrance to exit, on all lanes, incl. overtaking
- Driver must deliberately activate the system, but does not have to monitor the system constantly
- Driver can at all times override or switch off the system
- Take over request in time, if automation gets to its system limits
- Safety benefit via relief of the driver: no exhausting, manual driving during long distance driving
- Comfort benefit via relaxing and use of selected infotainment functionalities

// Parking Garage Pilot // level 4

- **Highly automated parking** including maneuvering to and from parking place (driverless valet parking), in parking garage
- **Driver does not have to monitor** the system constantly, may depart
- **Via Smartphone or key parking** manoeuvre and return of the vehicle is initiated
- **Safety benefit** due to avoidance of parking damages
- **Comfort benefit** due to time saving: short distances, customer does not have to access the parking garage

// Introduction scenario

5	Full automation					Robot Taxi
4	High automation				Parking garage Pilot	
3	Conditional automation			Traf. J. Cha. City Chauff.	Highway Chauffeur	
2	Partial automation		Parking ass. Traff. jam a.			
1	Assisted	ACC LKA	City Cruise Constr. ass.			
0	No automation	LDW FCW				
		<i>ADAS today</i>	<i>ADAS tomorrow</i>	<i>Automation Gen. 1</i>	<i>Automation Gen. 2</i>	<i>n.a.</i>

// Demonstrators
